

Codebook:

Do foetuses have the ability to retrieve and retain information presented by both the mother-to-be and partner?

Variable Name:	File:	Meaning:
Participant	Raw Data Copy.xlsx	The participant number used to ensure anonymity
Group	Raw Data Copy.xlsx	The group that the participants were exposed to the story recording of either the mother-to-be or the partner first to minimise order effect. 1 = Mother-to-be recording first 2 = Partner's recording first
Movement	Raw Data Copy.xlsx	The type of movement that was being recorded by the mother-to-be. Frequency = The quantity of foetal kicks per session. Intensity = The intensity of foetal movements per session.
D1M, D2M, D3M.....D14M	Raw Data Copy.xlsx	D1M, This relates to day 1 of the study, and the M relates to exposure to the mother-to-be's recording. D2M would express day 2 of the study and foetal

		exposure to the mother-to-be's recording and so on per day until day 14.
D1P,D2P,D3P.....D14P	Raw Data Copy.xlsx	D1P, This relates to day 1 of the study, and the P relates to exposure to the partners recording. D2P would express day 2 of the study and foetal exposure to the partner's recording and so on per day until day 14.
